Special Issue

Sustainable Development Goals, Valuation and Management of the Built Environment Stock

Message from the Guest Editor

This Special Issue welcomes research that shines a light on our comprehension of the true value of land, buildings, and other constructed facilities owned by municipalities and major private companies. In particular, it seeks the contribution that address sustainable development issues in the economics and management of construction investment projects, both new construction and R&M works. Research may include (but is not limited to) the following sustainability-focused topics:

- valuation of different types of properties (social housing, investment property, public facilities);
- economic evaluation and management of construction investment projects;
- innovative finance schemes for development projects promoted by public authorities;
- procurement practices;
- replacement policies of building components and equipment;
- methodologies for setting up economic useful lives of building and building components.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.
