

Special Issue

Sustainable Business, Corporate Social Responsibility and Law

Message from the Guest Editor

Sustainability has individual, organizational and society wide implications for the ecology as a whole; however, it is ultimately human behavior which will sustain or destroy the capacity of the ecology to support life. The challenge is that while industrialization has allowed humans to thrive by the same token, it has created a significant negative impact on the functioning of the ecology. Human interaction with the ecology, however, is regulated by law, from soft law such as international public law and industry-led codes to hard law passed by governments. Accordingly, the claim is made that law is able to lead to sustainable social practices. This special issue invites submissions that investigate efforts by businesses, citizens groups and law reformers/practitioners to improve the sustainability performance of business organisations. Submissions may range from investigations of peasant-farmers' norms, to national and even global social and environmental programs such as those focused on implementing United Nations norms. Methods of all disciplines are welcomed including, in particular, institutionalism and law.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
