

Special Issue

Sustainable Business and Management - the Role of Individual, Organizational and Societal Decision Making

Message from the Guest Editors

Individuals inside and outside business organizations can contribute meaningfully to reach sustainability goals. Individual decision making can be directed toward sustainability by creating a decision environment that enables people to make sustainable choices. How can behavioral science help to promote the concept of sustainability? How can the field of judgment and decision making contribute to encourage such behavior? In this Special Issue, we invite submissions that address the relationship between sustainable business and decision making. We welcome submissions that offer important conceptual and empirical insights into the intersections of sustainable business and decision making. Research shows sustainability decision making is value-laden and focuses on social action; therefore, papers submitted to this Special Issue may reflect on these values and action.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen
