

## Special Issue

# Sustainable Solutions for Carbon Dioxide Emissions Mitigation through Utilization Schemes

### Message from the Guest Editors

The SI aims to gather various potentially viable and feasible CO<sub>2</sub> mitigation, i.e., carbon capture and utilization schemes that contribute to the environmental and financial sustainability of industries currently labelled as a “pollutant”. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following: Carbon capture options in various industries and related challenges, chemical and physical CCU, co-optimizing, and the LCA of CO<sub>2</sub> EOR/EGR/ECBM, enhanced geothermal systems with possible combinations of energy storage and permanent CO<sub>2</sub> storage, the technological and economic potential of other CO<sub>2</sub> utilization options (CO<sub>2</sub> methanation, CO<sub>2</sub> to methanol, biofuels from algae, BECCS, carbonation – primarily in waste-to-energy plants, food freezing, beverages carbonation, and polymer production), and issues such as legal framework related to CO<sub>2</sub>, national CO<sub>2</sub> markets, and public communication and acceptance.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
