

## Special Issue

# Challenges and Strategies for Sustainable Transportation and Traffic Safety

### Message from the Guest Editors

There is a growing interest in sustainability, sustainable development and sustainable transportation. Several factors contribute to the great interest in the importance of these issues. There is also a huge need and enormous potential for improving road safety policies, practices, decision-making and strategies, in order to achieve a safe, efficient and sustainable transportation system. Due to the recent trends towards alternative and sustainable urban mobility modes (e.g. e-scooters) as well as the introduction of Connected and Autonomous Vehicles (CAVs) in future traffic, urban systems are expected to become even more complex. Hence, efforts by scholars and policy makers need to become more intense and be set under a framework. This Special Issue aims to present state-of-the-art research related to challenges and strategies for Sustainable Transportation and Traffic Safety.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
