

## Special Issue

# Chemical Pollution, Prevention, and Environmental Sustainability

### Message from the Guest Editors

Chemical pollution is currently one of the most concerning ecological problems on a global scale, due to the high risks posed to environmental systems and human health. This leads to the environment's ability to foster life being reduced as human, animal, and plant health become threatened. Chemical pollution occurs when chemicals resulting from human activities enter the environment, contaminating air, water, or soil. Pollution prevention, however, is a vital issue to sustainability. The Special Issue will focus on environmental pollution by chemicals (heavy metals, pesticides, and nanoparticles) and sustainable environment and pollution prevention management.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
