

Special Issue

China and World Sustainability: The Present Problem and Solution for the Future

Message from the Guest Editor

This special issue focuses on the evaluation, analysis and prediction of Chinese and World Sustainability; the recycling of renewable resources and the replacement of non-renewable fossil resources with renewable energy for the future; the science, technology and economic theory and method for developing a sustainable society and natural environment for both China and the World; the social change and thought transition, new production methods and new consumption styles for a sustainable China and World. Papers selected for this special issue were subject to a rigorous peer review procedure with the aim of rapid and wide dissemination of research results, developments and applications.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada
