

Special Issue

Advances in Architectures, Big Data, and Machine Learning Techniques for Complex Internet of Things Systems

Message from the Guest Editors

The purpose of this special issue is to publish high-quality research papers as well as review articles addressing recent advances in handling of architectures, big data, data integration, and machine learning techniques for complex IoT systems. Theoretical studies and state-of-the-art practical applications are welcome for submission. Keywords

- Complex IoT systems
- Big Data architectures
- Data Mining with Big Data
- Machine learning techniques for Big Data analysis
- Data visualization and integration
- Deep learning
- Cognitive systems

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
