

## Special Issue

# Circular Economy, Ethical Funds, and Engineering Projects

### Message from the Guest Editors

This special issue aims at providing ground for modern theories and applications in the evaluation of different alternatives for engineering projects, entrepreneurship models, and investor decisions. This special issue welcomes both theoretical and applied submissions, coming from cross-discipline applications of engineering, economics, production engineering and management in different sectors, including, but not limited to energy, industry, infrastructure, waste and water. The special issue will be of reference on how we are moving from the classical linear to the circular economy model for engineering projects.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
