

## Special Issue

# Deconstructing and Reconstructing the Circular Economy through Practice-Based Approaches

### Message from the Guest Editors

The evidence base indicating that human activity is generating a global climate emergency and ecological breakdown is growing inexorably. Therefore, policy-makers, their advisers and commercial actors are being increasingly forced to confront these challenges and to adopt approaches which offer pathways to a more sustainable future. This Special Issue seeks to contribute to the expanding literature on circular economy by inviting contributions which not only deconstruct CE but which also seek to reconstruct it by offering progressive visions of policy and practice. Practice-based research offering constructive critiques, especially in terms of ways that CE can be meaningfully integrated as a “strong” form of sustainability, will be especially welcome. Furthermore, reflections upon the impacts of the COVID-19 pandemic upon the implementation and uptake of CE practices are also sought, as is work that considers how, and indeed if, CE can be a meaningful contributor to more sustainable futures within the peripheries of the mainstream capitalist economy.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
