

Special Issue

Circular Economy in Food Supply Chain

Message from the Guest Editors

The circular economy concept is receiving growing attention as an alternative to the current linear economy “take, make, waste” concept. The circular economy conceives of a system with a minimum loss of resources in the production system through the reuse, recycling and recovery of materials and energy. Moving toward a circular food system is highly important, due to the huge greenhouse gas emissions, water and energy footprints of the food supply chain. In this regard, measuring the circularity of the food production systems is the first step in the process of moving towards a circular food production system. Given the importance and relevance of this Special Issue, we invite researchers to contribute original research articles as well as review articles. Potential topics include, but are not limited to:

- Measuring circularity in food supply chain
- Life cycle assessment of food production
- Sustainable food systems
- Food waste valorization
- Circular future food

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
