Special Issue

Innovative Techniques and Approaches towards More Circular and Inclusive Cities

Message from the Guest Editors

The development of environmentally friendly products and processes that respond to the challenges regarding circular economy has an evident social and economic interest. Successful outcomes require that we gain and integrate the knowledge acquired at different levels, from laboratory to real scales, but also involving multidisciplinary and multi-actor approaches along the whole value chain. This Special Issue, entitled "Innovative Techniques and Approaches Towards More Circular and Inclusive Cities" will bridge the gap in the lack of networked studies to successfully apply circular economy principles in cities, adopting the triple helix perspective of science-society-policy. We welcome original research papers and short reviews that reflect the state-of-the-art on multidisciplinary approaches to move towards more sustainable and democratic cities.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
