

Special Issue

Community, Circularity, and Sustainability: Climate Solutions

Message from the Guest Editors

This Special Issue responds to global concerns over the increasing frequency and duration of life-and livelihoods-threatening events of climate change on local communities, including heavy rains, floods, water scarcity, stress, thunderstorms, and droughts. A concept that has been proved to be effective to address economic, social, cultural and ecological problems arising from climate change is the "circular economy." By reusing, refurbishing, reducing, and recycling existing materials and products alongside regenerating ecosystems and traditional culture, it purportedly can alleviate stress on communities and their environments adversely affected by climate change. Designing circular supply chain network is essential for effective and efficient circular economy practices. The editors seek papers on different measures such as supply chain management practices, nature-based solutions (NbS) that offer practical solutions to climate change, poverty, livelihoods, wellbeing, and resource- scarcity. In addition, the editors seek contributions on bottom-up approaches in line with democratic political administration with the potential for green growth and sustainability.

Guest Editors

Assoc. Prof. Abdullah Al Mamun

Prof. Dr. Simon J. Bronner

Dr. Md Maruf Hossan Chowdhury

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
