

Topical Collection

Sustainable Citizenship and Education

Message from the Collection Editors

In accordance with the current environmental situation, sustainable citizenship and education have become key elements to ensure the future of humanity, and they are essential to foster sustainability awareness, critical participation, and socio-environmental improvement. Connected with the importance of sustainable citizenship participation and sustainable education, the United Nations published The Sustainable Development Goals, which include aspects such as Quality Education (Goal 4), Sustainable Cities and Communities (Goal 11), Responsible Consumption and Production (Goal 12), Climate Action (Goal 13), and Peace, Justice and Strong Institutions (Goal 16). Regarding this, education has become a fundamental means for transformation of the economy and society around the welfare of citizens, the sustainability of human activities, and the stability of the environment.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
