Special Issue

Sustainable City Logistics and Humanitarian Logistics

Message from the Guest Editors

Many cities around the world try to tackle complicated problems associated with urban freight transport including higher costs, traffic congestion, traffic safety, environment, and energy consumption. The concept of city logistics provides opportunities to solve these issues using innovative technologies of ICT (information and communication technologies), ITS (intelligent transport systems), IoT (Internet of things), big data, Al (artificial intelligence), and robots, as well as publicprivate partnerships among stakeholders. City logistics aims to improve the sustainability of urban freight transport systems by balancing economic growth and environmental friendliness. In disasters, humanitarian logistics are needed for providing quick and efficient systems for the delivery of water, food, daily commodities, and medical services to people affected by disasters at shelters and their homes. This Special Issue aims to provide knowledge and experience on the recent advancements of sustainable city logistics and humanitarian logistics. It highlights the modelling, planning, and management of sustainable urban freight transport systems in normal and emergency cases.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
