

## Special Issue

# Climate Risk Management for Resilient Agricultural Systems

### Message from the Guest Editors

This Special Issue (SI) focuses on cross-disciplinary research that applies climate knowledge in order to enhance its value to agricultural climate risk decision-making and support the resilience of agricultural production systems and associated socio-ecological systems (rural landscapes and communities). As such, we invite manuscripts that meet the following criteria:

- Focus: Integrated climate services (early warning and management of extreme events, including flash droughts; past and future climate on timescales including months, seasons, years and decades; value of climate services; adaptation decision support; climate insurance; policy; extension models; novel approaches to overcoming adoption barriers) for agricultural climate risk decision-making
- Scope: Land-based agricultural (food and fibre) production systems—global

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
