

## Special Issue

# Climate Change and Hydro-hazards: Incorporating Future Projections and Uncertainty into Adaptation Planning

### Message from the Guest Editors

This Special Issue focusses on research into the impact of climate change on hydrohazards. Submissions should push the envelope and demonstrate a holistic approach (systems thinking). Suggested topics include:

- Impact of climate change on urban areas;
- Mapping-projected hydrohazards and their uncertainties to specific locations;
- Exploration of multiple possible future scenarios, in terms of natural *and* societal aspects;
- Novel, post-hazard engineering or adaptation responses;
- Focus on decision support, in the design of engineering/policy interventions to increase urban resilience;
- Quantification of how urban vulnerability to hydrohazards may change over time;
- Novel methodologies, or applications of novel data, toward the above points—including, e.g., multimodel approaches, participatory methods.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
