

Special Issue

Climate Change Adaptation and Disaster Risk Assessments

Message from the Guest Editors

The current climate crisis is manifested in an accelerated increase regarding frequency and intensity of extreme events. Island and continental coastal states are the most vulnerable in this context. This Special Issue, called "Climate Change Adaptation and Disaster Risk Assessments", has, as its mission, to show the most relevant experiences and main scientific results that are currently being developed at the regional and local scale to face the environmental problems that affect these territories. Research papers that provide methodologies and specific studies case in areas of coastal risk management, planning, adaptive resilience, citizen science, capacity building for multi-hazard management, and sustainable development, will be welcome.

This Special Issue aims to compile papers that will broaden the scope of the international project entitled "Knowledge in Action for Urban Equality", as well as all the research papers submitted at the XIX Latin American Meeting of Marine Sciences COLACMAR 2022 (<https://colacmar.org/>) and the III Ibero-American Congress of Integrated Management of Coastal Areas (<http://ibermar.org/gial2023/>).

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
