Recent Advances in Global Climate Change, Air Pollution and Health Impact

Message from the Guest Editor

Both global climate change and air pollution are at the forefront of current global public health challenges. Climate change is anticipated to raise overall temperatures in the 21st century and will have profound impacts on human health, ranging from heat-related disorders, allergic and respiratory disorders, infectious diseases, to mental health impacts and violence. Exposure to ambient air pollution causes a wide spectrum of adverse health outcomes, from acute respiratory symptoms to premature death. Air pollution is currently the world's largest environmental risk. The threats of climate change and air pollution are interrelated, and are closely linked to overpopulation, poverty, socioeconomic injustice, and deteriorating human health. Our current interactions with nature are not sustainable. We invite high-quality research submissions covering a broad range of global climate change, air pollution, related health outcomes and social dimensions of health.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
