

Special Issue

Collaboration for Sustainability

Message from the Guest Editor

Collaborations that extends across academic disciplines and into professions and the organized general public are widely recognized as essential to produce the knowledge and innovation required to address sustainability challenges. However, the best way to organize and conduct such collaborations is not well understood, particularly as differences exist in epistemic cultures, professional practices, political interests, social backgrounds, sustainability challenges, and a lot of other work against effective collaboration. For this Special Issue, we invite papers that analyze the organization and dynamics of sustainability collaborations and that propose new patterns of collaboration to achieve sustainability goals. We encourage papers of every sort to address cultural differences, power dynamics, social justice, and equity.

- collaboration
- transdisciplinarity
- interdisciplinarity
- comparative analysis
- public engagement
- justice
- equity

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
