

Special Issue

Platforms and Digital Transformation for Sustainability

Message from the Guest Editor

We call for research on platforms, digital transformation, and sustainability and social impact. This Special Issue emphasizes the effective use of digital technologies that enable innovative business models, strategies, and initiatives contributing to the sustainability and social impact. Examples include Artificial Intelligence (AI), Robotics, Big Data, Internet of Things (IoT), Blockchain, Web3, and other emerging or exponential technologies. Submissions should address well-defined challenges and adhere to high-quality research standards, whilst generating novel business and policy insights. Interdisciplinary research, systems research and research that appreciates the *complexity* of business and social systems are especially encouraged. A list of proposed keywords follows, but articles on other relevant topics are also welcome.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen
