

Special Issue

Computational Modeling Techniques in Sustainable Materials, Systems and Structures

Message from the Guest Editors

Recent efforts and guidelines aiming to lower the environmental impact and footprint of materials, systems, and structures have led the scientific community to the development of eco-friendly materials. However, despite the importance of eco-friendly materials, they have not as yet been studied to the extent necessary for their wide application, in contrast to typical widely-used materials. This highlights a demand for the use and development of advanced computational techniques, aiming to reveal the nature and behavior of developed eco-friendly materials, thus facilitating their use in an effort towards achieving sustainability. The focus of this Special Issue is the development of computational methods for solving problems in the fields of sustainable materials, systems, and structures. Furthermore, please see below a list of potential keywords about the proposed journal.

Guest Editors

Prof. Dr. Panagiotis G. Asteris

Computational Mechanics Laboratory, Department of Civil Engineering,
School of Pedagogical and Technological Education, GR15122 Athens,

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
