The Conservation of Crops in Our Own Hands: Community-Based Agrobiodiversity Management Revisited

Message from the Guest Editors

After about a decade of practical experience, the purpose of this Special Issue is to revisit the community-based biodiversity management methodology through a review of successful cases and challenges encountered in relation to local forms of collective action and empowerment in rural areas that contribute to the sustainable conservation and management of agrobiodiversity. Of particular interest are cases that have used novel tools and methods (e.g., to increase awareness or set priorities), technologies (e.g., to add value or for marketing), partnerships, and networks (e.g., to connect producers to consumers or for policy advocacy and reform). We question what can be learned from practice to inform and improve the conceptual and methodological underpinning of community-based diversity management? Cases from the global north and south are welcome.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
