

Special Issue

Advances in Construction Performance Prediction Techniques: Perspectives for Sustainability

Message from the Guest Editors

This Special Issue is to solicit original theoretical, methodological, and empirical research papers associated with advances in construction performance prediction techniques. Topics of interest include, but are not limited to, the following:

- Simulation
- Statistical techniques
- Genetic algorithms
- Artificial neural network
- Expert system
- Case-based reasoning
- Artificial intelligence
- Virtual reality/augmented reality
- Smart construction
- Big data

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
