

Special Issue

Sustainable Construction Engineering and Management: Enablers of Change, Part II

Message from the Guest Editors

This proposed and pioneering ‘Special Issue’ aims to provide a platform for construction researchers who seek to showcase the emergent findings from their research not only on the roles various sustainability enablers, but also on how these enablers can disrupt the AEC industry’s ways of working. This Special Issue welcomes articles that offer novel insight into the challenges and opportunities for integrating these enablers into AEC projects, to advance the agenda of making projects sustainable in all facets. Both conceptual and technical papers and those focusing on specific operational or procedural solutions are encouraged. Submitted papers can be project-focused or may target organizations or industry at a strategic level, as their level of analysis. All pillars of sustainability comprising environmental, social, or economic considerations in AEC projects are welcome. Articles that explore decision support systems, theoretical aspects of multiple criteria modelling and optimization in crisp or uncertain environment or elaborate on the state-of-the-art case studies related to sustainable construction decision aiding, are appreciated

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
