

Special Issue

Consumer Behavior as a Central Component Strategy towards Sustainable Food Choices

Message from the Guest Editor

This Special Issue (SI) invites researchers in the relevant field to submit original and systematic reviews to expand knowledge in the field of consumer behavior related to sustainable new products, including functional foods, and alternative protein sources such as plant-based meat and dairy food alternatives, lab meat, and insects. The SI aims to enrich the existing knowledge in the emerging area of sustainability related to consumer behavior, interventions, and policies that are used to prevent food waste and loss, and promote sustainable diets, including local food varieties, and environmental and ethical labels such as organic and sustainable certifications, fair trade, animal welfare, and other related food labels. Interventions and policies to improve food plastic packaging waste related to recycling behaviors, understanding the recycling labels and practices, including consumers' choice behavior of sustainable food packaging alternatives made from biodegradable, compostable, and edible materials, are included in the SI as well.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
