

Special Issue

Consumer Behavior and Sustainable Food Development

Message from the Guest Editors

Some of the main issues the world is facing today are climate change, consumption of resources, waste, pollution, and food-related diseases. These problems affect consumption choices and contribute to defining a new consumer profile. The modern consumer, in fact, is not only more selective, informed, and interested in quality, but they are also more sensitive to social, environmental, and health issues. As a consequence, in the last few decades, consumer demand for food with healthy, eco-friendly, ethical, and sustainable characteristics has been growing. Moreover, the current consumer is aware that their purchases have an impact on the environment and on the quality of life of the world population. The food industries have answered to these modern consumer needs by adopting product and process innovations that aim to increase the quality, safety, and sustainability of food. In light of this evolution, it is of fundamental importance to evaluate the emerging drivers and barriers of food consumption behavior.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
