

Special Issue

Corporate Sustainability, Social Responsibility, and Environmental Management for Social Innovation

Message from the Guest Editors

The Carroll Model, encompasses those economic, legal, ethical and philanthropic expectations that society has of organizations at a given moment of time, to the most current theories related to the concept of social innovation, that promote development and implementation from different spheres of new ideas to satisfy social needs and create new collaborative relationships that act as an engine of social change. The objective of this Special Issue is to define in what way the most recent conceptual developments of CSR derive positive consequences both for the social environment. (1) based on the different meanings of CSR describe current evidence on; (2) the set of organizational and/or environmental antecedents that stimulate the effective adoption of this management strategy; (3) on its consequences at the micro, meso, and macro level in the social environment for the near future. Prof. Dr. José Luis Vázquez-Burguete Prof. Dr. Luis Ignacio Álvarez-González Prof. Dr. María Isabel Sánchez Hernández

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
