

Special Issue

Sustainability in Corporate Governance and Strategic Management II

Message from the Guest Editor

Sustainability, in its current conceptualization, has evolved for several decades along the perspective of sustainable development. However, its alignment with corporate governance has taken a somewhat disparate trajectory. The received framing of sustainability, particularly in corporate practices, is in the so-called “ESG” area, which stands for “environmental, social and governance”. In essence, governance is positioned as an aspect or even constituent of sustainability. This Special Issue seeks scholarly papers that integrate sustainability with corporate governance in the setting of strategic management. It welcomes multifaceted approaches to the theme, including conceptual, empirical, and case studies. These can deal with a variety of settings, such as for-profit companies, including family businesses; nonprofit organizations, including charities; and public sector agencies, including governments.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
