Corporate Sustainability and Sustainable Management in Changing Environments

Message from the Guest Editors

The current global economy has shown that increasing volatility and growing challenges, such as climate change, inequalities, and pandemics, require the transformation of managerial models from a financial perspective to a sustainable management according to sustainable environmental and social criteria. In changing environments, companies must be capable of adaptation to enable long-term sustainability. To that end, internal and external changes are needed in the business of keeping the relevant stakeholders: employees, customers, and suppliers involved. To address this situation, capabilities must be developed that enable the creation, retention, and sustainability of new values required in situations of change, as they create a disruption in the market and thus directly affect the results of the company, its commitment to stakeholders, and their/ its impact on the economy. This Special Issue presents different approaches of corporate sustainability to address changes in markets and economies.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
