Special Issue

Sustainable Development for Corporations: Challenges and Opportunities in Climate Change Background

Message from the Guest Editors

In recent decades, unprecedented climate change has been recognized as one of the most serious environmental issues worldwide threatening a sustainable future for our planet. In response to the reduction of adverse consequences of global warming. the United Nations (UN), among others, call for the active participation of businesses along with agents of public and civil society towards sustainable development. However, corporations, especially in developing economies, encounter practical issues at the same time, such as the cost of transitioning to low carbon or carbon-free energy or the cost of technological innovation. Thus, a clear understanding of the challenges and opportunities as well as their relationship in the ongoing process of tackling climate change translates to a high level of sustainable development for corporations, while it has been long devoid of in-depth research. All these considerations motivate the proposal of this Special Issue, which aims to collect studies and research, as well as theoretical contributions, on sustainable development for corporations in the context of climate change.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G OC5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
