The Impact of the COVID-19 Pandemic on Sport Tourism

Message from the Guest Editors

The impact of COVID-19 on all the sectors of the international sport industry, including sport tourism, has been dramatic (Parnell et al., 2020; Ratten, 2020). It is estimated that more than USD 60 billion of revenue in the global sport industry will be finally lost as a result of COVID-19 (Gough, 2020). Sport tourism has been particularly hit by COVID19. Most of the local, national and international events have been cancelled or are taking place with a different distribution mode (e.g., without fans, with limited number of participants etc.). Outdoor activities and programs have also been cancelled due to travel restrictions. However, since some forms of sport tourism activities, such as outdoor recreation, are alternatives to mass tourism, they are predicted to grow in the future. Alternative business models, based on digitalization and personalization, are also proposed to be developed in the future, as a strategy to cope with the changing business environment and the changing consumer expectations. This Special Issue invites empirical and conceptual papers, which discuss the impact of COVID-19 on the sport tourism industry.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
