

Special Issue

COVID-19 and the Sustainability of Global Economies

Message from the Guest Editors

COVID-19 has led to a widespread change in the behavior of companies, governments and individuals, and it continues to impact the global economy and the society as a whole. Although it has been approximately two years since the outbreak of the COVID-19 pandemic, policy makers at both the national and firm levels are still facing a high degree of uncertainty, which originated from the changing health conditions and disrupts their future planning.

The purpose of this Special Issue, to be published in Sustainability, is to continue to learn about the impact of the COVID-19 pandemic on the world's economics and financial markets, and to determine the necessary steps required to maintain a sustainable economic system. The topics of interest include, but are not limited to, the following:

- Financial stability and resilience of economies;
- Connectedness of capital markets and economies;
- ESG and sustainable finance;
- Green investments and safe assets;
- Monetary systems and inflation hedging post COVID-19;
- Emerging and developed economies during COVID-19;
- COVID-19 uncertainty and investors sentiment;
- Tourism sector challenges

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits
