Sustainable Cropping Systems for a Changing Climate

Message from the Guest Editor

Agricultural systems around the world are facing numerous challenges due to biotic and abiotic factors. Water scarcity, climate change, land degradation (salinization, desertification, soil erosion, and loss of fertile soil), and emerging pests are among the factors that are impacting and threatening agricultural systems and global food security. Concerns about the sustainability of the current cropping systems are increasing, and there is a great need for alternative cropping systems to address these concerns.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
