

Special Issue

Introducing Corporate Social Responsibility and Sustainability in Management Education

Message from the Guest Editors

This Special Issue comprises its focus on the integration of Corporate Social Responsibility and sustainability in management education. Many universities are seeking new methodologies and new ways to make such a transition in business schools. There seems to be concern about whether business students acquire the appropriate competences, skills, and knowledge related to this field and know how to ensure their effective acquisition. However, this debate is still open and new approaches are necessary. With this in mind, this Special Issue aims to comprise a selection of papers addressing not only the integration of Corporate Social Responsibility and Sustainability in academic curricula but also providing the most appropriate learning methodologies to this end and their integration in a strategic level. Authors from management disciplines and other disciplines related to CSR and sustainability are invited to submit their work. Both theoretical and applied research articles are welcome.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
