

## Special Issue

# Policies and Governance for Sustainability in the Cultural Management Context

### Message from the Guest Editors

Without management and policy, sustainability is merely a word. How do we manage for sustainability, especially in the context of culture—sustainability's fourth pillar (Hawkes, 2001)? This Special Issue examines how governments, institutions, organizations, communities, and individuals contribute to sustainability through management and policy. Our focus is on sustainability, broadly conceived; as more than the environment and preservation of natural resources. We are interested in culture-led sustainable development, sustainability of culture and cultural identity, of art/practice and expression, sustainability of arts/cultural organizations, how cultural sustainability endorses the sustainability of culturally or socially divided communities, and reflection on innovative ways to sustain economies through cultural and creative entrepreneurship and their challenges. For further reading, please visit the [Special Issue Website](#).

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
