Special Issue

The Role of Culture and Food Heritage in Promoting Sustainable Food Choices and Tackling Global Challenges

Message from the Guest Editors

Understanding the impacts of food system activities on the natural environment and communities is an urgent global concern. Published literature demonstrates that the adoption of sustainable patterns of production and consumption in food and agriculture has a great impact on the development of sustainable food systems (e.g., Blay-Palmer, 2010). Sustainable food production and consumption, as well as the interconnectedness of food systems, are crucial concerns in the globalised world; therefore, they are addressed by a wide range of disciplines. The aim of this Special Issue of Sustainability is to present the latest theoretical ideas and methodological approaches to examining the relationship between food heritage and sustainable food choices and its role in tackling global challenges. We welcome submissions from a wide range of disciplines and sub-fields including anthropology, sociology, geography, heritage and cultural studies, archaeology, history, social and political ecology, agroecology, food studies, political economy, and cultural and natural resource management. Particular emphasis will be given to interdisciplinary works and innovative perspectives.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G OC5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
