

Special Issue

Data Analytics and Blockchain in Transport Systems

Message from the Guest Editors

The advances of Information and Communication Technologies (ICT) in recent years provide new opportunities to build more efficient and sustainable transport systems. This not only enables an integrated management of various transport resources, but also provides extensive data to support the operation management issues. Besides the various data analytics methods and decision-making tools for reaping the value of extensive transport data, the emerging technology of blockchain enables trustworthy data processing and sharing across the entire transport ecosystem. In order to promote the adoption of data analytics and blockchain technologies for more efficient and sustainable transport systems, this Special Issue aims to publish state-of-art research on the new models and approaches to data analytics and blockchain technologies, as well as their innovative solutions in transport systems.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
