

Special Issue

Mathematical and Data-Driven Tools to Measure Sustainability

Message from the Guest Editors

We invite you to contribute to this Special Issue of *Sustainability* that focuses on expanding the use of mathematical and data-driven techniques to generate unique perspectives on the current status of sustainability worldwide. We invite interdisciplinary research papers that leverage non-traditional approaches to help us to understand the contours and complexities of sustainability.

We seek original work applying mathematical tools to social science analysis and the development of new datasets for both current and future use. Consequently, these papers could range from exploring the content analysis of sustainability goals to network analysis of complex social networks working together in support of (or in opposition to) sustainable development at all levels of governance.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
