Decision-Making Approaches to Support the Sustainability of Supply Chain System in Pandemic Disruptions

Message from the Guest Editors

The current COVID-19 pandemic has created massive disruptions in supply, demand, and production. Such an outbreak reveals the darkness in non-dynamism supply chains. This Special Issue aims to address the advantages and consequences of a dynamic and resilient supply chain system along with its connected elements. It would also help researchers and practitioners to answer questions such as: how could decision-making help managers in managing their supply chain risks? How would decision-making improve global supply chains in recovering from COVID-19 pandemic disruptions in future? How would Industry 4.0 applications help in improving supply chain risk management? This Special Issue looks for novel ideas, strategies, and models first to aid the economy, and then to push industrial and production partners to rethink, feed, and maintain the local and international markets after COVID-19 disruption.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
