Application of Decision-Making Approaches under Uncertainty for Sustainable Transport

Message from the Guest Editors

Sustainable transport requires adequate and timely decision making in order to improve quality and ensure efficiency. Multi-criteria decision making appears as one of the most important fields of operational research in the last 15 years, with newly developed methods and uncertainty approaches. There are various criteria that need to be considered to address the problems in sustainable transportation, which can be crucial for the overall sustainability in logistics and sustainable supply chains. In this regard, theories such as fuzzy set theory, neutrosophic theory, rough set, and uncertainty theory can provide real-time solutions to uncertainty problems.

We invite authors to submit the original research articles which propose novel decision/making models considering transport.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
