

Special Issue

Sustainable Design, Manufacturing, Logistics, and Maintenance Using Big Data Analytics and Artificial Intelligence

Message from the Guest Editors

We encourage researchers and practitioners equally to submit their works to Special Issue "Sustainable Design, Manufacturing, Logistics, and Maintenance Using Big Data Analytics and Artificial Intelligence" to share their ideas and efforts in improving sustainability of various operations. In particular, we would like to see the use of big data analytics, artificial intelligence, and alike in empirical studies and the development of new solutions over a wide range of areas, including design, manufacturing, logistics, and physical asset management. Papers that take interdisciplinary perspectives will also be considered favorably. While we will accept quantitative models, qualitative works, case studies, and empirical research, they need to show the practicability of their propositions if possible. Review papers are also welcomed if they provide new insights to the related practice.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
