Sustainable Development of Online Shopping and Mobile Catering based on Artificial Intelligence Technologies

Message from the Guest Editor

With the continuous progress and popularization of information communication technology (ICT), people are doing more and more things connected to daily life, including shopping and ordering meals, on the Internet. In recent years, the rapid development of artificial intelligence (AI) technologies has enabled various ICT applications to have intelligent capabilities. More rapid, efficient, proactive, and effective AI applications are continuously being developed, which also promotes the continuous growth and expansion of the online mobile consumer market. This Special Issue calls for any submissions of state-of-the-art research articles providing new theoretical and practical insights into the topic of “Sustainable Development of Online Shopping and Mobile Catering based on Artificial Intelligence Technologies”.
