

## Special Issue

# Development of Renewable Energy from Perspectives of Social Science

### Message from the Guest Editors

This Special Issue comprises selected papers on development of renewable energy from the perspectives of social science. In between development of renewable energy and that of conventional, fossil energy, there seems to be one clear difference in terms of stakeholder management: active involvement of new and versatile types of actors, including citizens and lay people, who often receive costs associated with fossil energy through, for example, air pollution. In order to develop renewable energy, thus, it is important to design and manage an institutional environment where each party would be willing to accept their responsibility. To do so, economic studies including incentive mechanism design, analyses of external costs and life cycle costs, and institutional analysis and managerial studies, including stakeholder management, risk perception, risk management, and motivation are invited. Papers selected for this Special Issue will be subject to a rigorous peer review procedure with the aim of rapid and wide dissemination of research results, developments, and applications.

### Guest Editors

Prof. Dr. Tsunemi Watanabe

Faculty of Society & Design, Bond University, Gold Coast, Queensland 4226, Australia

Dr. Lingling Wang

School of Regional Design, Civil Engineering Department, Utsunomiya University, Tochigi, Japan

### Deadline for manuscript submissions

closed (1 September 2021)

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
