

Special Issue

Development Sustainable with Diet and Physical Activity on Health and Performance

Message from the Guest Editors

In the context of sustainable development, nutrition and physical activity are key factors for developing and maintaining good health and performance. Sustainable diets are a kind of diet with low environmental impact which contribute to food and nutrition security and to healthy life, while also, optimizing natural and human resources for present and future generations. Physical activity is an effective strategy to reduce non-communicable diseases and road traffic deaths, decrease the morbidity and mortality caused by air pollution, and improve mental health. Therefore, there is a strong synergy between nutrition and physical activity and SGDs. In this Special Issue, we focus on four aims that are vital to sustainable development:

- To improve scientific knowledge of ensuring healthy living in athletes and various people in the community;
- To increase evidence on promoting well-being for all at all ages between athletes and amateurs;
- To increase the development of scientific foundations with quality of life and physical activity on health and performance of different communities;
- To increase awareness of diet about the health and performance of different communities.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
