

Special Issue

Diet and Health Economics for Sustainability

Message from the Guest Editor

This Special Issue will consist of articles focusing on sustainability, broadly defined, as it relates to food choices, dietary quality, and health outcomes. Topics of interest include the intersection of dietary quality and production practices by food categories, the determinants of food choices as they align with dietary recommendations, the food manufacturing practices relevant to emerging trends in consumer food choices, the estimation of the impact of food choices and dietary quality on health outcomes across all time frames, and the relationships between the food environment and health outcomes. The issue will also consider papers that address the implications of dietary trends and consumer spending behavior on the financial sustainability of firms in the food supply chain, including producers, manufacturers, and retailers. Consumers have multiple sources to choose from when seeking dietary advice and guidance, and research papers comparing the sustainability of various recommendations will be considered. About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
