

Special Issue

Diffuse Contamination of the Environment – From Heavy Metals to Microplastics

Message from the Guest Editor

Local, regional, and global environments are subject to a range of diffuse contamination issues that are caused or exacerbated by human activity. Some of these involve naturally occurring elements and compounds, whereas others relate to xenobiotics. Some are inconsequential, whereas others may pose serious threats to ecosystems, human health, and economic activity. Many are only poorly or partially characterized. In this second Special Issue devoted to diffuse contamination of the environment, we invite any papers that explore the spread, status, environmental behavior, and/or potential significance of any instance of diffuse contamination, from heavy metals to microplastics. Papers relating to any diffuse contamination issue are welcomed, and the scope is wide to facilitate a broader conversation. The selected topic may:

- a: involve one element or compound, or a class or category of substances;
- b: focus on one environmental compartment or be multicompartmental;
- c: take the form of a research paper or a systematic review article;
- d: include the results of specific monitoring investigations, or modeling studies, or applicable

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
