

Special Issue

Digital Economy, E-commerce, and Sustainability

Message from the Guest Editor

The rapidly developing Internet, whose control is decentralized and which is run by self-regulated software systems, provides an unique and exciting opportunity that could potentially revolutionize the conventional ways of doing business entirely. The aim of this Special Issue is to create a discussion platform (approaches, opinions, ideas) focused on new and emerging solutions and technologies that might be successfully applied in the configuration, improvement, and management of companies, supply chains, and networks in the highly volatile environment of today's global economy. A list of some potentially interesting topics for this session is provided below:

- E-commerce;
- Innovative business models;
- Novel business models and automations in the digital economy;
- Social impact and interactions in digital economy;
- Environmental impact and interactions in digital economy;
- Sustainable supply chain;
- Smart logistics;
- Artificial intelligence in e-commerce and supply chains;
- Modeling and simulation of business processes.
