

Special Issue

Studies on the Interaction between Digital Technology and Sustainable Business Processes from a Decision-Making Perspective

Message from the Guest Editors

The call for new products and processes to focus on sustainability requires strategic changes in operational processes, governance practices, supply chains, and organizational structures. Firms are progressively adopting socio-environmentally techniques, technologies, and production processes to improve their sustainability. These aspects have led organizations to make considerable investments into exploring how they can use digital technologies to build or improve their sustainable business models. This Special Issue intends to support firms in improving their sustainable business processes using digital technologies to maintain their competitive advantages. Specifically, our aim is to enrich the literature in different but related fields such as innovation and digital technologies, business processes and operations management, sustainability, and strategic management studies.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen
