

Special Issue

Disability Studies and Sustainable Ecology

Message from the Guest Editors

In this Special Issue we want to consider the relationship between disability and sustainability from a different angle. Instead of just focusing on people with disabilities as a vulnerable group, and ecological changes as a risk, we want to explore how the conceptual thinking around disability in society interacts with the challenging rethinking of society that will be necessary for sustainability. We are asking: how can a critical perspective on disability, and a view of sustainability that incorporates the diversity inherent in disability, help guide us towards a future that incorporates a more holistic notion of interdependence and, hence, sustainability in our relationship with each other as humans but also with the natural world that surrounds and sustains us?

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
